Summary

I am an Information Technology student at the University of San Carlos who enjoys making and designing websites. My technical interests primarily focus on front-end web development and crafting minimalist user interfaces, supported by foundational backend experience with PHP, Node.js, and C for university projects.

Education

University of San Carlos - Talamban Campus

B.S. in Information Technology *2025–Present*

Projects

University & Personal Projects

Developer

- **self-hosted-RSS-aggregator:** Designed and developed a self-hosted RSS and Atom feed reader featuring a bookmarked reading list, a guest mode, and a custom Zen Browser-inspired interface (PHP, MySQL, HTML, CSS, JavaScript).
- **budget-tracker:** Developed a minimalist budget tracker web application integrating custom ASCII artwork, user savings goals, and data export functionalities (JavaScript).
- **certification-tracker:** Designed and implemented a proof-of-concept training and certification tracking system enforcing access controls for employees, managers, and administrators (PHP).
- **CLI-repository-manager:** Built a proof-of-concept CLI-based developer registry and project management tool (PHP).
- **local-share:** Created a local network file sharing application hosted on the University of San Carlos DCISM student web server (JavaScript).
- **my-portal:** Developed a personal website portal showcasing project repositories and links (JavaScript).

Technical Skills

Programming	C, C++, PHP, JavaScript, R, Node.js
Web Development	HTML5, CSS3, React, Tailwind CSS
Databases	MySQL, MariaDB, PDO, Supabase
OS / Distro	CachyOS (Arch Linux), Windows
Other Tools	Git, GitHub, PowerShell (Oh My Posh), Alacritty, RStudio, Hyprland, Waybar
